

Tube connections for your design line

Spectrum modular handrail and balustrade systems are easy to connect without need for welding or unsightly external fixtures.

A huge range of pre-fabricated tubular components and infills provides the versatility to realise the most demanding design concepts.

Design Concept

Easily adaptable to drawings with bespoke options available

Manufactured off-site to an exacting standard

Stainless steel or aluminium in a wide choice of colours

Easy to assemble on site with minimal fuss or mess

Design Realisation
