

# She's just turned her lights on...

## ...in Huddersfield!

**At Titanic Mill, optional 'SMART' technology brings apartment purchasers the ultimate in remote control convenience.**

SMART offers a range of control systems, from voice activation to phone operation. You can programme lighting sequences, open or close blinds and shutters or activate services and appliances – all by remote control. SMART allows stereo in every room (even en-suites) from one source, and there's no limit to the number of TV or broadband computer installations.

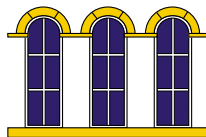

SMART puts your apartment's heating, lighting, appliances, entertainment and security under your total control, whether you're relaxing in your apartment or lazing on the beach in St. Lucia.

But with Titanic Mill's other attractions, including an opulent restaurant and bars, Spa beauty therapy salons, gymnasium and pool, perhaps foreign holidays won't hold quite as much appeal as before!

One and two bedroomed apartments from **£133,295** to **£267,600**
